

The Hose Washing Machine Compact is a mobile and highly efficient fire hose washer designed for fire services and industrial users.

Its lightweight and portable design allows easy transportation, providing maximum flexibility in hose maintenance operations. The system is optimized for single-operator use, making it both practical and cost-efficient.

Key Features

- Fully mobile and easy to transport
- Designed for single operator performance
- No additional tools required
- Maintenance-friendly construction
- Durable aluminium body and covers
- Equipped with extra robust brushes
- Delivers excellent washing results

Performance & Design

- Engineered to meet high performance and cleaning standards
- Harmonized and user-friendly design
- Minimal operator training required
- Reliable and consistent washing results
- Becomes an essential part of any hose maintenance workflow

Required Connections

- Power supply
- Water supply
- Drainage

Construction

- Compact and space-saving design
- Strong aluminium frame and protective covers
- Built for durability and long-term use

Why Choose HM100?

This machine is an ideal solution for organizations that require:

- Efficient and high-quality hose cleaning
- Mobility and operational flexibility
- Reduced training time
- Simple and reliable operation

Technical Specifications

Parameter	Value
Length	116 cm
Width	70 cm
Height	145 cm
Weight	170 kg
Washing Pump Pressure	150 bar
Hose Size Range	25 – 76 mm

Optional Accessory: Mobile Polypropylene Transport Cart

For improved handling and transportation of hoses, a Mobile Transport Cart is available as an additional accessory.

Features

- Lightweight and fully mobile design
- Made of durable polypropylene (high-quality plastic)
- Corrosion-resistant and suitable for wet environments
- Equipped with smooth-rolling caster wheels
- Designed for easy loading and transport of hoses

Benefits

- Easy maneuverability in tight spaces
- Reduces manual handling effort
- Long service life and high durability
- Ideal for daily use in fire stations and industrial environments

Optional Accessory: Mobile Hose Roller+

To enhance operational flexibility, an optional Mobile Hose Reel Stand is available for efficient hose handling and coiling.

Features

- Mobile design with durable caster wheels for easy movement
- Stable stainless-steel construction
- Designed for convenient hose winding and unwinding
- Ergonomic handling for a single operator
- Compatible with various hose lengths and diameters

Benefits

- ✓ Simplifies hose coiling process
- ✓ Reduces physical effort for operators
- ✓ Improves workflow efficiency
- ✓ Ideal addition to any hose maintenance setup
