

Arete Fire Hose Prewasher Tanks are designed for effective pre-cleaning and soaking of firefighting hoses before the drying process.

The system allows removal of dirt, debris, and contaminants, ensuring optimal preparation of hoses for further maintenance and extending their service life.

Key Features

- Efficient pre-cleaning and soaking of hoses
- Flexible internal configuration
- Suitable for water and cleaning chemicals
- Highly durable and corrosion-resistant materials
- Easy mobility with heavy-duty wheels
- Designed for intensive professional use

Technical Specifications

Parameter	Value
Length	1200 mm
Width	800 mm
Height	871 mm
Compartments	Up to 4 (customizable)
Material (tank)	Polypropylene
Frame elements	Stainless steel
Mobility	Heavy-duty wheels
Parameter	Value
Length	1200 mm

Applications

- Fire departments
- Rescue services
- Hose maintenance facilities
- Industrial cleaning operations
