

Arete Hose Drying Cabinets are designed for fast, reliable, and safe drying of firefighting hoses and protective equipment.

With an integrated hot air system, the cabinet ensures uniform drying in up to 3 hours, while intelligent control maintains optimal conditions throughout the process.

Key Features

- Fast drying – up to 3 hours
- Fully automated operation
- Temperature & humidity control
- Automatic shut-off after drying
- Robust industrial design
- Easy to operate and maintain

Advanced Drying Technology

The system combines:

- Integrated hot air blower
- Even air distribution across all shelves
- Smart sensors for temperature and humidity
-

The cabinet prevents overheating by maintaining safe temperature levels (up to 40°C), ensuring protection of hoses and materials.

Smart Control System

The cabinet is equipped with a TFT control panel for full process management:

- Real-time temperature & humidity display
- Adjustable drying time and temperature
- Simple start/stop operation
- Control panel display

Durable Construction

- Frame: powder-coated structural steel
- Shelves & internal parts: stainless steel
- Insulated walls for energy efficiency

Designed for:

- Long service life
- Resistance to moisture and wear
- Easy cleaning and maintenance

Ease of Use

- Overheat protection
- Automatic shut-off after drying cycle
- Controlled operation via sensors
- Designed for professional use in accordance with safety standards

Technical Specifications

Parameter	HDC-6	HDC-10
Length	850 mm	2200 mm
Width	1000 mm	1000 mm
Height	1950 mm	850 mm
Max. Shelves	6	10
Power Supply	230/400 V	230/400 V
Heater Power	3600 W	3600 W

Safety & Compliance

Arete Hose Drying Cabinets are designed with a strong focus on safety, reliability, and compliance with European standards.

The equipment is developed and manufactured in accordance with relevant EU directives and industrial safety requirements.

Compliance includes:

- CE Marking
- ISO Standards
