

The Arete RollMaster E150 is a compact and mobile electric hose winding machine designed for fast and efficient rolling of firefighting hoses.

Powered by a high-performance motor, the unit ensures smooth and consistent winding of hoses up to 150 mm in diameter, significantly reducing manual effort and saving time.

The machine can be used as a standalone solution or seamlessly integrated into the Arete Hose Maintenance System.

Key Advantages

- Fast and efficient hose winding process
- Suitable for all types of hose materials
- Operated easily by a single user
- Compact and space-saving design
- Lightweight and highly portable
- No additional tools required

Performance & Efficiency

The powerful electric motor delivers:

- Stable and reliable winding performance
- High winding speed for increased productivity
- Consistent results regardless of hose type

Designed for daily operational use, the machine minimizes manual workload and improves workflow efficiency.

Ergonomic & User-Friendly Design

- Designed for single-operator use
- Intuitive operation without complex setup
- Comfortable working height and positioning
- Quick start and operation

Durable Construction

- Body and covers made of aluminium
- Resistant to wear and corrosion
- Maintenance-friendly design
- Built for long-term industrial use

Safety Features

- Overload protection system
- Stable operation during winding
- Reliable electrical components

Technical Specifications

Parameter	Value
Length	63 cm
Width	60 cm
Height	130 cm
Weight	50 kg
Hose Diameter	25 – 150 mm
Power Supply	Single-phase

Applications

- Fire departments
- Rescue services
- Hose maintenance facilities
- Industrial safety units
